

The IEEE Australia Council

Student Paper Contest

The IEEE Australia Council Student Paper Contest for postgraduate and undergraduate students offers IEEE student members an opportunity to exercise and improve their written and verbal communication skills.

Throughout an engineer's career graduates are constantly called on to communicate ideas to others. Researching, writing, and presenting a paper provides students with invaluable early experience in expressing ideas related to their professional field.

Since the contest's primary function is to improve an engineering student's communicative skills, all IEEE student members in Australia are encouraged to participate in the contest.

The contest will be conducted for two separate categories: undergraduate students and postgraduate students. To promote the engineering profession among female students, the contest also offers prizes in both categories to members of IEEE's Women in Engineering affinity group.

The undergraduate student contest is open to IEEE student members undergoing an undergraduate course in electrical engineering, electronics, computer science or allied subjects.

The postgraduate student contest is open to IEEE student members with basic degrees in electrical engineering, electronics, computer science or any other field of interest of an IEEE Society, who are studying for a postgraduate degree.

Eligibility to enter the contest must be supported by the student branch counsellor's certification on the entry form if an IEEE student branch exists at the student's educational institution.

Papers should be submitted through the Student Activities Chair of the local IEEE section, or the local section chair.
